Dual axle box trailer	Yes	1500kg *
Tray top light vehicle	N/A	1000kg*

**Estimates only. Customer should refer to manufacturers specifications. The loading of vehicles and trailers is governed by Chain of Responsibility (COR) legislation. All parties have a legal obligation to obey road transport laws.*

QUANTITIES

Calculating volumes of mulch is easy. Measure length, width and depth of your area to be mulched and multiply.

Firstly calculate the area to cover ie length x width = square metres, decide the depth of material needed and use the table below to determine the volume required.

Product Volume Calculator

Material Depth & Area Covered (m2)							Volume
50mm	75mm	100mm	125mm	150mm	200mm	250mm	0.4m3 (1 scoop)
8.00	5.25	4.00	3.20	2.65	2.00	1.60	
Material Depth & Area Covered (m2)							Volume
50mm	75mm	100mm	125mm	150mm	200mm	250mm	you require
Area (square metres)							
20	13	10	8	7	5	4	1m3
40	27	20	16	13	10	8	2m3
60	40	30	24	20	15	12	3m3
80	53	40	32	27	20	16	4m3
100	67	50	40	33	25	20	5m3
120	80	60	48	40	30	24	6m3
140	93	70	56	47	35	32	7m3
160	107	80	64	53	40	32	8m3
180	120	90	72	60	45	36	9m3
200	133	100	80	67	50	40	10m3

An easy to use volume calculator can be found on our website.

Product Information & Pricing

SOIL MIXES

GARDEN MIX

Chicken manure, crushed and graded pine bark and mill waste, blended with peat and top soil. This mix is formulated for the vegie garden or general purpose planting. Approximate Ph 7.4.

POTTING MIX

Composted screened pine bark, NPK fertilisers, trace elements and wetting agents. Pine bark is used as it decreases the risk of disease and it has drainage characteristics. PH adjusted to between approximately 5.4 & 6.5.

LAWN MIX

Blended spearwood red loam, yellow sand and manures. Excellent for top dressing lawns.

SOIL CONDITIONER

Chicken manure & sawdust is blended together with peat. Add to existing poor quality soil as an additional source of organics. Designed to mix into existing soil. **DO NOT** plant directly into soil conditioner on its own as it has a strong manure blend & may burn plants.

LANDSCAPE MIX

A black soil mix composed of soil conditioner, yellow sand and loam. Suitable for planting straight into, and specially formulated for native seedlings and tube stock.

OTHERS

WHITE SAND

YELLOW SAND (SCREENED)

BLUE METAL (10MM)

GRAVEL

FIREWOOD (SPLIT)

AVAILABILITY

Product availability is dependent on supplier availability. Grumpy Gnome Garden Supplies **cannot guarantee** continued supply of stocked products and substitutes may be stocked as required.

MULCHES

MUJA BLACK MULCH

This mulch contains woodwaste and crushed bark and it will retain its black colour.

KARRI & PEAT MULCH

Crushed jarrah & karri bark, blended with peat. This is a popular mulch for every garden.

KIMBERLEY RED MULCH

This mulch contains crushed pine slithers. It is red in colour & holds its eye catching colour well.

MARRI WOODCHIP

Marri mill waste cut into large chips.

NATURES MULCH

Mulched tree loppings and wood fines. A mulch with a natural presentation.

BUSHLAND MULCH

This black mulch is composed of crushed pine slivers, wood fines, screened black topsoil and manure blended together. It is suitable for all gardens including natives as a feed mulch. Apply to area 60mm thick. Turn once at mid-season to allow for even breakdown of mulch. Approximate Ph 7.2.

SAFETY & CARE

Care should be taken when handling these products as irritations or respiratory problems may occur. A group of organisms called legionella is found in these products Use gloves and masks when handling these products.

COLOUR RUN-OFF

Freshly produced mulches may be subject to colour wash-off which can stain driveways, paving bricks etc.

HINTS & TIPS

Mulching is primarily carried out to retain moisture in your garden. This in turn encourages strong and healthy growth in your garden. Your choice of mulch will depend on your needs ie sunny or shaded position, strength of winds and personal preference of colour and texture.

Organic mulches will naturally decompose over time, adding beneficial nutrients to the soil and contributing to garden health. Some mulches will decompose faster than others. For example, coarse products such as wood chips will take longer to break down than finer mulches.

Mulch should be applied 60-100mm thick. Avoid mulching close to plant stems or tree trunks.

DELIVERIES

We deliver loads* from 2m3 to 5m3, dependent on delivery location, product weight and product availability. Please contact our friendly staff to book your delivery on our scheduled delivery days.

Please refer to our pricing guide for our current delivery charges based on your location.
